— AND —

**TEXAS STATE
UNIVERSITY
SAN MARCOS**

Human beings have a basic desire to form and sustain relationships of depth and substance. We also have an essential need to be appreciated and understood. The means by which we negotiate differences in personalities, relational styles, culture, and worldviews can either enrich a relationship or impede it. In this conference, participants will examine creative ways to help clients form empathic connections and build enjoyable, productive relationships.

The conference goals are to provide participants with an opportunity to:

- ❖ Connect personally with their creative capacities, while using these capacities to connect with others.
- ❖ Acquire new methods for fostering deepened awareness for therapeutic change.

We hope to see you there!

Thelma Duffey, Ph.D.
